Passionate Java Developer with a good foundation in Core Java and Angular. Dedicated to crafting user-friendly web applications. Gaining experience in both backend and frontend through work at Uniaxial Software Pvt. Ltd. Committed to delivering high-quality code and continuously learning. Eager to contribute innovative solutions to meaningful projects as a beginner in the field.

EXPERIENCE

Jr. Full Stack Developer   Baneshwor, Kathmandu

Uniaxial Software Pvt. Ltd.   Jan, 2023 - Present

- Integral part of the team developing the Public Access Module (PAM) for the government's Department of Land Management and Archive.
- Collaborated on both Java (Spring Boot) backend and Angular frontend components, ensuring seamless integration.
- Contributed to problem-solving sessions, code optimization, debugging, and testing for a high-quality end product.

EDUCATION

Bachelor of Computer Science   Kathmandu, Nepal

Texas College of Management & IT   May, 2019 - Sep, 2023

PROJECTS

Hotel Management System

Led the development of a Hotel management system backend using Spring Boot, Hibernate, and MySQL, featuring secure authentication, Spring Security, and RESTful API endpoints for hotel operations. The project emphasized data integrity through rigorous testing and industry best practices, highlighting my proficiency in backend development. https://github.com/udaya1i/Hotel-Management-System_SpringBoot

Blog Application

Developed a blog application using Angular 14 for the front end with Bootstrap for styling. The application consists of two sections, an admin panel for managing posts and a user section for reading blogs. Utilized Firebase as the backend to handle data storage and retrieval. This project demonstrates my proficiency in front-end development and integration of cloud-based services. https://github.com/udaya1i/Blog-Application-Angular

SKILLS

Core Java, Spring, Springboot, Hibernate, HTML, CSS, JavaScript, Bootstrap, Angular, MySQL, Python, Flask, LInux

LANGUAGE

English, Nepali, Hindi
